

Content Cambiare 312 – The best of both worlds!

With the introduction of the Cambiare 312, Content offers organists a real Hauptwerk™ organ, in which the advanced and innovative technology of our digital organs plays an important role. The Virtual Player Position from our digital organs is now available for the Cambiare Hauptwerk Organs and start with the launch of the Cambiare 312. This development offers the possibility to determine where the organist is in the *virtual church space* or even to "walk" through the chosen church space! By moving with the sliders the sound is distributed over the various speakers by the Content Audio Protocol.

In combination with using the Content Invention Technology, we also have applied the most recent Hauptwerk™ developments. For example, the Cambiare 312 comes standard with the full license Hauptwerk™ version V. This makes it possible for the organist to select the reverberation level for the selected sample sets. This is not only attractive for the sound experience, but it also reduces the customer's investment in sample sets. Where the previous version of Hauptwerk™ had to extract the reverb from the sample set and thus the customer had to buy a surround version of a sample set, the reverb is now added on a dry sample. This means savings for a customer: instead of the surround version, a dry version of a sample set is sufficient. The organist can save in purchase costs, varying per sample set. If there is no dry version of a desired sample set (yet), it is up to the organist to decide whether to load a complete sample set or to use, for example, only the front samples. This can be agreed in consultation with Content Advisors.

In addition to the above functionalities, it is possible to expand the Cambiare 312 with 7 ExtraVoice voices, including a grand piano, pan flute, trumpet and string ensemble.

In short: the Cambiare 312 offers all the advantages of a standard Hauptwerk™ organ with many extras that provide the ease of play and flexibility to arrange the sound to your own liking.

CONTENT 

Specifications Content Cambiare 312:

- 3 keyboards TP60LF
- 30 note pedal board
- Bench with music storage
- 2 High-Defined touchscreens
- Easy set-up via Content User Interface (CUI)
- Sliders for volume, reverb en position
- Hauptwerk V license
- iLok Dongle for license management
- Virtual Player Positions
- Hauptwerk Reverb™
- Over more than 8 reverb positions
- Recordings of own playing
- Advanced audiosystem with 10 speakers
- Inbuild 3D surround
- A number of complete samplesets included
- Optional 7 ExtraVoices, like Grand Piano, Trumpet, Panflute, Orchestra, etc.
